By GotYou Telematics

**Enhanced Security & Efficiency**  
to Protect your load with  
PTO Lockout Solutions

# Revolutionize Trailer Load Security & Operational Control

Discover how our innovative telematics technology ensures optimal security and efficiency for your transport operation.

## The Need for PTO Lockout in Transport Operations

Power Take-Off(PTO) systems are essential in operating side tipper trailers, enabling the mechanical functions required for tipping. However, with proper management control, PTO lockout systems reduce business risks:

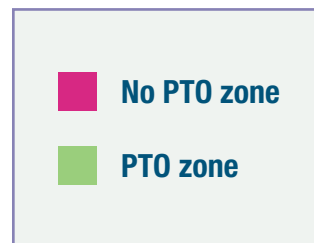

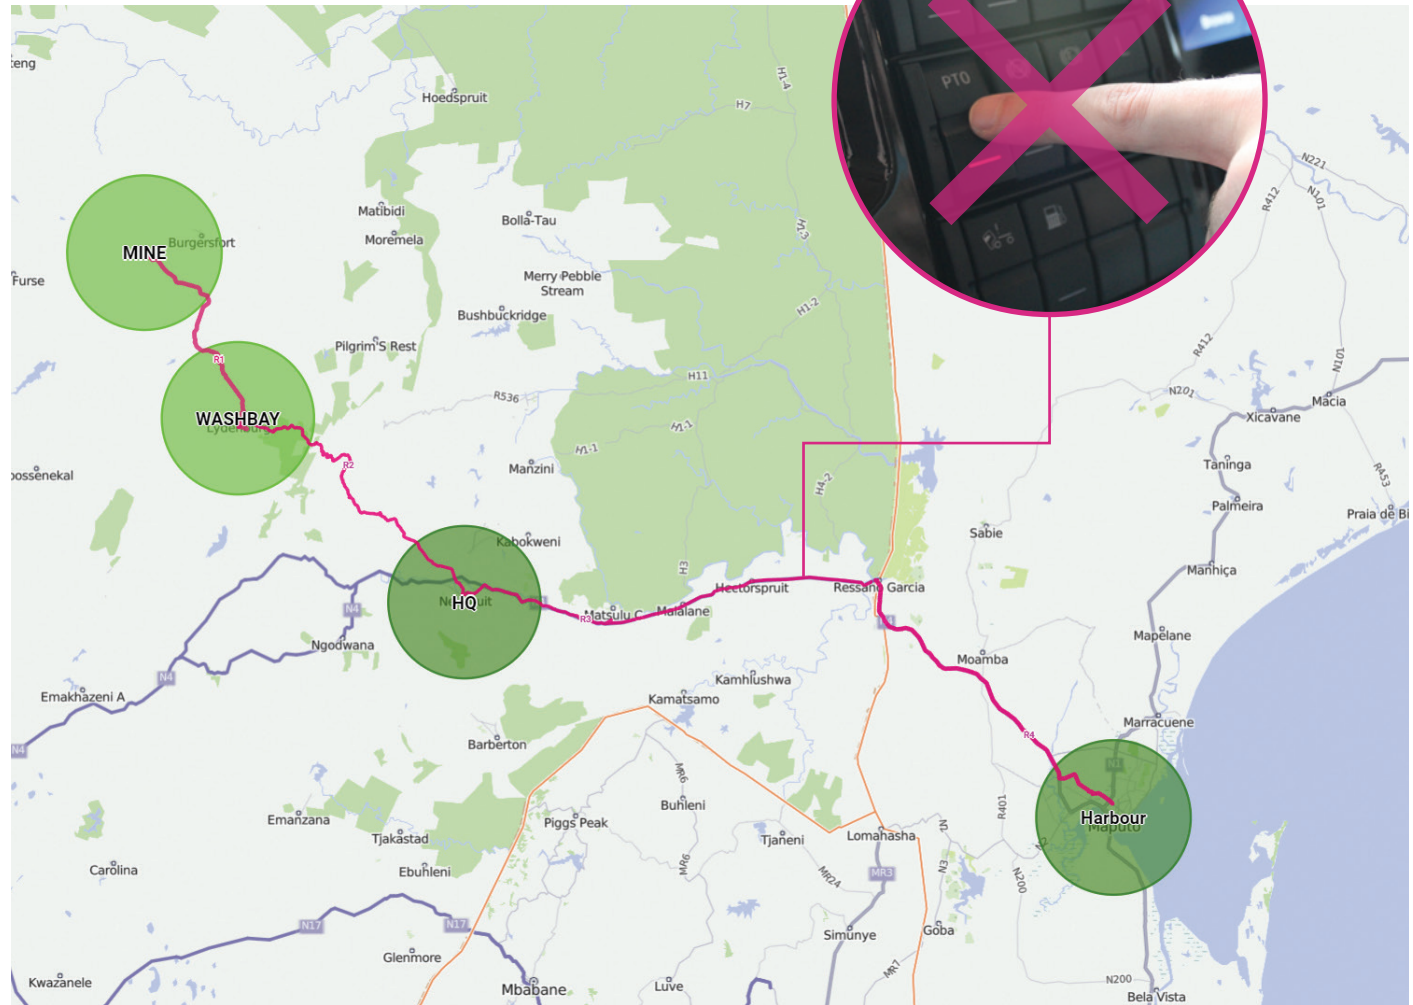

- **CARGO SWAPPING RISK REDUCED**
- **UNAUTHORIZED OFFLOADING REDUCED**
- **COMPLIANCE WITH CLIENT CONTROL PROCESSES**
- **SABOTAGE RISK REDUCED**

Our telematics-enabled PTO lockout solution addresses these challenges by ensuring that PTO systems are only active within designated green zones, thereby enhancing security and operational efficiency.

# OUR SOLUTION – Telematics-Enabled PTO Lockout

Our advanced telematics device integrates seamlessly with your existing side tipper trailers to provide a robust PTO lockout solution.

- **Green Zones:** Define specific areas where PTO activation is safe and permitted. Outside these zones, the PTO is automatically disabled.
- **Real-Time Monitoring:** Our system provides real-time updates and alerts, ensuring complete control over PTO usage.
- **User-Friendly Interface:** Easily configure green zones and monitor PTO status through our intuitive telematics interface.

## Benefits:

- Win More Transport Contracts
- Become an industry leader in the tipper transport market
- Reduce your Insurance Risk Profile

● Disable PTO automatically in risk areas

Ryan Gerber (Owner of GotYou Telematics) & Gys Jacobs (Co-Owner of Jacobs Transport).

## Success Stories and Next Steps

Join the rank of satisfied clients who have transformed their transport operations with our PTO lockout solution.

“Since implementing the GotYou PTO lockout project, our efficiency is increasing significantly. The system is paying for itself. It's a game-changer for our fleet management.”

Jan Jacobs, Jacobs Transport, Co-owner.
