

Eco Driving

Prevent car accidents and violations, reward careful driving, reduce fuel expenses, avoid fines, and pay less for vehicles maintenance

Eco Driving

Use ECO Driving function with instant feedback for the driver. Provide better driving style, reduce accident rate, prevent traffic violations, and reward careful drivers to decrease fuel and maintenance costs.

Use state-of-art Eco Driving solutions to:

Decrease fuel costs

Spend less fuel by tracking harsh acceleration, braking, speeding or cornering. Increase vehicle health.

Provide security on the road

Improve safety with belt, headlights and turning signals reminders in any format.

Avoid fines and accidents

Create in-cabin alert system to promote better driving habits. Reward best drivers.

Why Eco Driving by Galileosky?

Real-time driver notifications prevent traffic violations

Correct driving style online and analyze reports

Any format alerts and reminders:

Speed limits monitoring in different geofences

SMS, audio, LED or other

How does it work?

- 1 Galileosky tracking device determines driving style by high-end built-in accelerometer
- 2 It does not matter how the device is positioned and where in the car it is installed
- 3 The system works reliably in any conditions, even in tunnels and mountainous areas
- 4 Each device is calibrated automatically to be installed in a car
